Amazing Dentures

A step-by-step guide for both clinicians & technicians in providing patients with dentures which look real and have fantastic function

This day is designed for all experiences of dentists, prosthodontists, clinical dental technicians, dental technicians, dental nurses and other interested members of the dental team. It is aimed at igniting the whole dental team's enthusiasm and love for removable prosthodontics, showing how we can change our patients' lives with beautifully made dentures. It will also be a terrific refresher day for people who have attended Finlay's courses in the past. He will be presenting totally new and up to date cases, showcasing his methods and techniques used to deliver dentures with superb aesthetics and optimal function. Finlay will cover partial dentures, complete dentures and implant retained dentures.

It will be a thoroughly practical and clinically useful day; illustrated with photographs and videos showing how Finlay and his dental technician, Rowan Garstang, produce the following types of removable dentures exhibiting superb form and function;

- **Complete dentures**
- **Partial dentures**
- **Implant supported denture**

Finlay says, "I used to worry when providing dentures for my patients as success was so unpredictable. After dedicating the last 20 years to this discipline, although I still find them challenging, I now love making them and it is all I do in my clinical practice. Additionally, I love teaching dental professionals exactly how we do it. I am so fortunate in having one the world's finest dental technicians working in the next room, Rowan Garstang. Since 2007 we have made over 700 dentures in our practice and none of our patient (to our knowledge) have had to have dental implants to support our dentures afterwards."

LEARNING AIMS, OBJECTIVES & OUTCOMES:

- > Better understand state-of-the-art complete denture, partial denture and implant supported denture construction.
- > To learn that well designed and well-made removable dentures are a valid alternative to implant supported restorations.
- > To learn how to select denture teeth that look real.
- > To learn the biologically healthy Scandinavian design system for partial dentures.
- > To see the construction methods and function of partial dentures which work like removable bridges, protecting the periodontium of compromised abutment teeth.
- > To learn a system of partial denture design which anticipates future abutment failure allowing artificial tooth additions onto cobalt chromium minor connectors of the denture later.
- > To learn superb impression techniques.
- > To see perfectly accurate recording of centric relation with gothic arch tracing.
- > Learn how to maximise complete denture retention and stability.
- > Have improved ability to make dentures look like beautiful natural teeth.
- > Learn how to use implant attachments such as Locators® and bars in the best way.
- > Learn how to make dentures fit implants and the supporting soft tissues properly.
- > Have improved communication amongst the whole dental team.
- > Have improved patient outcomes when providing dentures.
- > Have improved understanding of metal reinforcement to strengthen the dentures.

Dr Finlay Sutton

BDS, DGDP (UK),
MSc, MFDS RCS Ed,
MRD RCS Ed, PhD,
FDS (Rest Dent)
RCS Ed. Registered
Specialist in Restorative
Dentistry, Prosthodontics,
Endodontics & Periodontics.

Finlay qualified as a dentist in Sheffield in 1993 and worked in General Dental Practice for 6 years.
