Advanced Complete Dentures (Conventional and without Implants)

A ONE DAY "HIGH END" REVISION COURSE
by Finlay Sutton

This enjoyable day is designed for people who have attended Finlay's "in-house" **2 day Personalised Complete Denture course**. It is a perfect refresher and revision day for people who have been putting into practice Finlay's complete denture teachings.

Ideal for both clinician and technician teams.

Finlay will cover all the steps he uses to provide superb complete dentures, focusing on particularly difficult cases.

Both conventional and implant supported dentures will be covered in detail.

Delegates are encouraged to ask Finlay advice about cases they have treated or plan to treat.

The day is designed for Dentists, Specialists in Prosthodontics, Clinical Dental Technicians and Dental Technicians.

Dr Finlay Sutton

BDS, DGD (UK), MSc, MFDS RCS Ed,
MRD RCS Ed, PhD, FDS (Rest Dent) RCS Ed

Finlay is a Specialist in Prosthodontics based in the UK having specifically chosen to limit his clinical practice to the discipline of dentures.

He loves providing comfortable and life-like dentures which profoundly improve a patient's quality of life.

Finlay particularly enjoys teaching dental professionals how to provide state of the art dentures. As well as demonstrating the techniques in producing optimal functioning and natural looking dentures another important aim is to ignite enthusiasm for removable prosthodontics proving that dentures are a valid treatment modality even in the age of dental implants.

Finlay qualified as a dentist in 1993 and spent 6 years in general dental practice. During this time he found denture provision (and prosthodontics in general) unpredictable and as a result very stressful. This led him to leave general practice and gain a further 6 years formal training in prosthodontics and restorative dentistry at Manchester and Liverpool dental hospitals prior to starting his specialist referral practice in 2007.

Finlay now concentrates his professional life within three areas of removable prosthodontics, namely;

1. clinical provision of dentures for patients,
2. training/lecturing for dentists, clinical dental technicians and dental technicians,
3. research and development

Finlay loves spending the rest of his time with his family and friends. Additionally, he enjoys running, playing badminton, meditating and reading.

Aims, objectives and anticipated outcomes:

- Revise all the steps Finlay uses to make superb conventional and implant supported complete dentures
- Discover how Finlay tackles extremely difficult complete denture cases
- Learn how to optimise denture retention and stability
- Revision of managing the patient to achieve a successful outcome
- Fill in the gaps in your knowledge, including impression making, gothic arch tracing, and optimising complete denture aesthetics
- Get help with your most challenging complete denture cases
- Learn how to optimise the use of dental implants to supplement retention

Advanced Complete Dentures (Conventional and without Implants)
