Partial Dentures

A ONE DAY MASTERCLASS

Lectures and live demonstration on a patient by Finlay Sutton

I absolutely love providing partial dentures for my patients as they are often life changing. I will show you how to make partial dentures function like "removable bridges" and prove that they are viable alternatives to dental implant supported restorations. In addition, I will demonstrate that well designed and made partial dentures can have superior aesthetics over fixed restorations. I will share with you the techniques and methods Rowan Garstang (my dental technician) and I use to achieve predictable results with removable prosthodontics.

We provide a special form of partial denture design which is based around a solid chassis (major connector) which splints mobile teeth protecting the periodontium of the remaining natural teeth as much as possible. I will show you how I design and manage all combinations of missing teeth. As well as discussing tooth positioning and partial denture occlusion I will show you how I make accurate impressions and record the occlusion, using gothic arch tracing (in a live demonstration on a patient) enabling Rowan to make accurately fitting partial dentures.

This day is aimed at dentists, clinical dental technicians and dental technicians consisting of a live patient demonstration and lectures abundantly illustrated with step by step photographs and videos of all procedures.

Dr Finlay Sutton

BDS, DGD (UK), MSc, MFDS RCS Ed,
MRD RCS Ed, PhD, FDS (Rest Dent) RCS Ed

Finlay is a Specialist in Prosthodontics based in the UK having specifically chosen to limit his clinical practice to the discipline of dentures. He loves providing comfortable and life-like dentures which profoundly improve a patient's quality of life.

Finlay particularly enjoys teaching dental professionals how to provide state of the art dentures. As well as demonstrating the techniques in producing optimal functioning and natural looking dentures another important aim is to ignite enthusiasm for removable prosthodontics proving that dentures are a valid treatment modality even in the age of dental implants.

Finlay qualified as a dentist in 1993 and spent 6 years in general dental practice. During this time he found denture provision (and prosthodontics in general) unpredictable and as a result very stressful. This led him to leave general practice and gain a further 6 years formal training in prosthodontics and restorative dentistry at Manchester and Liverpool dental hospitals prior to starting his specialist referral practice in 2007.

Finlay now concentrates his professional life within three areas of removable prosthodontics, namely;

1. clinical provision of dentures for patients,
2. training/lecturing for dentists, clinical dental technicians and dental technicians,
3. research and development

Finlay loves spending the rest of his time with his family and friends. Additionally, he enjoys running, playing badminton, meditating and reading.

Aims, objectives and anticipated outcomes:

- Making partial dentures as stable, comfortable and secure as possible
- A good understanding of a step by step design sequence
- Optimising the aesthetics of partial dentures
- Making accurate impressions of the hard and soft tissues for cobalt chromium castings
- Record occlusal relations accurately using gothic arch tracing
- Designing partial dentures to limit periodontal damage
- Be able to adjust partial dentures, without compromising their fit and making gaps between teeth and the denture
- Make partial dentures fit and work like removable bridges
- Designing dentures for future tooth failure and additions
- Have happier patients with improved outcomes
- Better communication between dentist, CDT and dental technician
- Increased professional satisfaction and rekindle your enthusiasm for partial dentures

Partial Dentures

With 7 hours verifiable CPD

Places are limited to 8 so reserve your place(s) today.

Course Details:

Programme:

8.30-9.00	Registration and refreshments
9.00 – 11.15	Partial denture design, impression making, occlusal registration using rims and gothic arch tracing
11.15 – 11.30	Refreshment break
11.30 – 13.00	Patient demonstration impression making, registration and gothic arch tracing
13.00 – 14.00	Lunch
14.00 – 15.00	Finlay's case presentations – delegates practice designing for each case
15.00 – 15.15	Refreshment break
15.15 – 17.00	Finlay's case presentations – delegates practice designing for each case

Course Fee: £1,154.00 per person

Dates: Thursday 18th May or Thursday 16th November 2023
Thursday 16th May or Thursday 21st November 2024

Venue: Health Innovation One, Sir John Fisher Drive,
Lancaster University, Lancaster, LA1 4YW
