FINLAY SUTTON

REMOVABLE PROSTHODONTICS EDUCATION

Advanced Partial Dentures (Including Attachments, Crowns and Implants)

A ONE DAY "HIGH END" REVISION COURSE

by Finlay Sutton

This fun day is designed for people who have attended Finlay's "in-house" "**Art of removable partial dentures**" a one day master class. It is a perfect refresher and revision day for people who have been putting into practice Finlay's partial denture teachings.

The fantastic Scandinavian Hygienic partial denture system will be revised and explored in more depth. I will cover extremely challenging cases in step-by-step detail.

The course is ideal for both clinician and technician teams.

Delegates are encouraged to bring models and photographs of cases for me to design live during the day. I will refer to cases treated with similar arrangements of missing teeth.

Partial dentures supported by dental implants, attachments and milled crowns will be shown in step by step detail.

The day is designed for Dentists, Specialists in Prosthodontics, Clinical Dental Technicians and Dental Technicians.

Dr Finlay Sutton

BDS, DGD (UK), MSc, MFDS RCS Ed,
MRD RCS Ed, PhD, FDS (Rest Dent) RCS Ed

Finlay is a Specialist in Prosthodontics based in the UK having specifically chosen to limit his clinical practice to the discipline of dentures.

He loves providing comfortable and life-like dentures which profoundly improve a patient's quality of life.

Finlay particularly enjoys teaching dental professionals how to provide state of the art dentures. As well as demonstrating the techniques in producing optimal functioning and natural looking dentures another important aim is to ignite enthusiasm for removable prosthodontics proving that dentures are a valid treatment modality even in the age of dental implants.

Finlay qualified as a dentist in 1993 and spent 6 years in general dental practice. During this time he found denture provision (and prosthodontics in general) unpredictable and as a result very stressful. This led him to leave general practice and gain a further 6 years formal training in prosthodontics and restorative dentistry at Manchester and Liverpool dental hospitals prior to starting his specialist referral practice in 2007.

Finlay now concentrates his professional life within three areas of removable prosthodontics, namely;

1. clinical provision of dentures for patients,
2. training/lecturing for dentists, clinical dental technicians and dental technicians,
3. research and development

Finlay loves spending the rest of his time with his family and friends. Additionally, he enjoys running, playing badminton, meditating and reading.

Aims, objectives and anticipated outcomes:

- Gain a full understanding of the Scandinavian hygienic removable partial denture system
- Learn how to treat extremely challenging cases in step by step detail – such as extreme free end saddle (distal extension bases)
- Have improved confidence talking all cases
- Revision of impression and jaw registration techniques to make partial dentures fit perfectly
- Learn how to make partial dentures look just like natural teeth
- Minimise clasp and metal show
- Update on immediate dentures
- Learn how to use attachments, crowns and dental implants with partial dentures
- Revision of managing our patients' expectations

Advanced Partial Dentures (including Attachments, Crowns and Implants)

With 7 hours verifiable CPD

Places are limited to 8 so reserve your place(s) today.
