FINLAY SUTTON

REMOVABLE PROSTHODONTICS EDUCATION

Advanced Dentures (Complete and Partial Solutions)

A ONE-DAY "HIGH-END" REVISION COURSE
by Finlay Sutton

This engaging and comprehensive day is designed as a refresher and advanced revision session for those who have previously attended Finlay Sutton's specialised courses on complete and partial dentures. Ideal for clinician and technician teams, this course covers both conventional and implant-supported complete dentures, as well as advanced techniques for removable partial dentures including the use of attachments and dental implants.

Dr Finlay Sutton

BDS, DGD (UK), MSc, MFDS RCS Ed,
MRD RCS Ed, PhD, FDS (Rest Dent) RCS Ed

Finlay is a Specialist in Prosthodontics based in the UK having specifically chosen to limit his clinical practice to the discipline of dentures.

He loves providing comfortable and life-like dentures which profoundly improve a patient's quality of life.

Finlay particularly enjoys teaching dental professionals how to provide state of the art dentures. As well as demonstrating the techniques in producing optimal functioning and natural looking dentures another important aim is to ignite enthusiasm for removable prosthodontics proving that dentures are a valid treatment modality even in the age of dental implants.

Finlay qualified as a dentist in 1993 and spent 6 years in general dental practice. During this time he found denture provision (and prosthodontics in general) unpredictable and as a result very stressful. This led him to leave general practice and gain a further 6 years formal training in prosthodontics and restorative dentistry at Manchester and Liverpool dental hospitals prior to starting his specialist referral practice in 2007.

Finlay now concentrates his professional life within three areas of removable prosthodontics, namely;

1. clinical provision of dentures for patients,
2. training/lecturing for dentists, clinical dental technicians and dental technicians,
3. research and development

Finlay loves spending the rest of his time with his family and friends. Additionally, he enjoys running, playing badminton, meditating and reading.

Aims, objectives and anticipated outcomes:

- Revise all the steps Finlay uses to make superb conventional and implant-supported complete dentures.
- Discover how Finlay tackles extremely difficult complete denture and partial denture cases.
- Learn how to optimise denture retention and stability for both complete and partial dentures.
- Gain a full understanding of the Scandinavian hygienic removable partial denture system.
- Revision of impression and jaw registration techniques to make dentures fit perfectly.
- Update on immediate dentures and how to use attachments, crowns, and dental implants effectively.
- Making dentures robust and aesthetic, minimizing clasp and metal visibility.
- Enhance communication and management of patient expectations for successful outcomes.

Advanced Dentures (Complete and Partial Solutions)

With 7 hours verifiable CPD
