Immediate Dentures

A ONE DAY CLINICAL MASTERCLASS

Lectures and live demonstration on a patient

by Finlay Sutton

Immediate dentures are often some of the most difficult and least well-tolerated dentures that we give our patients. I will share with you the techniques and methods Rowan Garstang (my dental technician) and I use to achieve predictable results with immediate dentures. I will show how I make superb impressions — even with mobile teeth in the way. The process from diagnosis, treatment planning, and treatment provision will be shown in detail. This will be full of tips, techniques, and practical advice which can be implemented straight away into practice.

This course is designed for dentists, clinical dental technicians, and dental technicians, with a live impression demonstration and lectures abundantly illustrated with step-by-step photographs and videos of all procedures.

Dr Finlay Sutton

BDS, DGD (UK), MSc, MFDS RCS Ed,
MRD RCS Ed, PhD, FDS (Rest Dent) RCS Ed

Finlay is a Specialist in Prosthodontics based in the UK having specifically chosen to limit his clinical practice to the discipline of dentures.

He loves providing comfortable and life-like dentures which profoundly improve a patient's quality of life.

Finlay particularly enjoys teaching dental professionals how to provide state of the art dentures. As well as demonstrating the techniques in producing optimal functioning and natural looking dentures another important aim is to ignite enthusiasm for removable prosthodontics proving that dentures are a valid treatment modality even in the age of dental implants.

Finlay qualified as a dentist in 1993 and spent 6 years in general dental practice. During this time he found denture provision (and prosthodontics in general) unpredictable and as a result very stressful. This led him to leave general practice and gain a further 6 years formal training in prosthodontics and restorative dentistry at Manchester and Liverpool dental hospitals prior to starting his specialist referral practice in 2007.

Finlay now concentrates his professional life within three areas of removable prosthodontics, namely;

1. clinical provision of dentures for patients,
2. training/lecturing for dentists, clinical dental technicians and dental technicians,
3. research and development

Finlay loves spending the rest of his time with his family and friends. Additionally, he enjoys running, playing badminton, meditating and reading.

Aims, objectives and anticipated outcomes:

- Increase professional satisfaction when providing immediate dentures
- Make immediate dentures as stable, comfortable, and secure as possible
- Provide useful insights for implant dentists in the process of producing fixed restorations with the teeth positioned aesthetically in the 'right place'
- Correctly prepare the models
- Take superb impressions even with mobile teeth and bridges
- Plan cases carefully to achieve optimum aesthetics and function of immediate dentures
- Know the best time to relines or remake the dentures
- Ensure happier patients with improved outcomes
- Enhance communication with your dental technician.

Immediate Dentures
